On 26th of June 2017 the Management Board of PDH Polska S.A. passed a resolution as a dominant variant during the project implementation. The project includes the construction of petrochemical complex, consisting of the propylene production plant (PDH), polypropylene production plant, port with tanks storage and OSBL, with the the total capacity of 400 000 tonnes of polypropylene annually.

The project scope is a construction of petrochemical complex including:

- the propylene production plant
- the polypropylene production plant.

This recommendation made by Management Board of PDH Polska S.A. on 26th of June was accepted by the Company's Supervisory Board. The Company will continue discussions concerning the contracting of propylene in order the presents to the final decision on updating the project and choosing realization variant.

Once the feasibility study will be presented the final decision on the variant of the investment will be made.
